

# *Frustrated fascination*

$$-20 = -20$$

$$16 - 36 = 25 - 45$$

$$16 - 36 + \frac{81}{4} = 25 - 45 + \frac{81}{4}$$

$$\left(4 - \frac{9}{2}\right)^2 = \left(5 - \frac{9}{2}\right)^2$$

$$4 - \frac{9}{2} = 5 - \frac{9}{2}$$

$$4 = 5$$
